

Single Post Triple Wing Climber

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

Build an eccentric playground with the Single Post Triple Wing Climber! Children can start the fun by putting their hands or feet through the holes to climb up the wings. The staggered holes will stimulate motor planning and will build leg and arm strength as they ascend. The holes also give kids fun new vantage points of the playground. A versatile structure, children do not have to climb to enjoy these panels. Three wing panels encourage cooperative ground play. They are angled, so kids can create a mini-maze or play hide-and-seek. The slender, flat configuration means that it will not take up a large amount of play space either. These uniquely designed panels are certain to spark creativity in young minds. Kids can pretend they are noble warriors with large shields or that they are traversing across giant leaves on the forest floor. Make this structure more unique by choosing from our wide scope of color options!

Product Specifications

Age Range: 5-12 years

Child Capacity: 4-6

Fall Height: 96"

Post Diameter: 4.5-inch

Product Type: Get Physical

Safety Zone: 14' 9" x 21' 0"
